SUMMARY

Co-founder who built a coding academy to 14 paying clients and ~₹2.6L revenue with ₹0 spent on ads. Now owns funnel-leak and no-show research at Yocket, turning unclear sales problems into decisions backed by data.

EXPERIENCE

Business Operations Intern — **Mumbai**
Yocket — *Sep 2026 – Present*

- Given full ownership of consultation no-show research, a problem the team couldn't explain; designed the questions and call approach, targeting ~50 calls a day, and built no-show vs attendee personas. Some recommendations are being implemented.
- Redesigned the call-audit format into six scored dimensions, a log of student doubts and one next-time action per advisor; automated first drafts with a Python pipeline (Whisper transcription + LLM) and a human review step.
- Built funnel analysis tools on own initiative: speed-to-lead tracker, drop-off map by lead source and stage, and a tagging system linking audit findings to funnel drop-offs; synthesised results into a manager-facing summary.

Co-Founder — **Mumbai**
Code1o1 — *Apr 2025 – Present*

- Built a coding academy from zero to 14 paying clients at ~₹18,600 revenue per client, with ₹0 on ads.
- Analysed the acquisition funnel: ~500 cold calls yielded 4–5 clients (~1%) while all 4 in-home consultations converted; stopped cold calling and moved all acquisition to word of mouth and in-person pitching.
- Designed 11 courses (Python, AI/ML, Python in finance) and taught 16 students from Grade 5 to college over ~400 hours; ran a 5-student summer camp that brought in ₹35,000.
- Led client-facing consultations and closed most deals; wrote the cold-call script; hired and managed 3 interns across creatives, marketing, and outreach.

Inside Sales Executive, Jaguar Land Rover Showroom — **Mumbai**
Modi Auto Group — *Feb 2026 – May 2026*

- Built an Excel model for the showroom's General Manager that replaced manual commission tracking for the entire sales team.

Intern, Sales and Strategic Partnerships — **Mumbai**
BizDateUp — *Nov 2023 – Mar 2024*

- Primary point of contact negotiating venue contracts with five-star hotels (The Lalit, JW Marriott, Novotel) for the Startup Investors Conclave 2024; converted leads into 40+ paid attendees at ₹5,000 per seat.

PROJECTS

Aur Sunao: Pricing and Unit Economics — *Coursework, Semester 5 (2024), team of 6; unit-economics review 2026*

- Found the ₹499 plan cost ₹761 to deliver (−₹262 per subscriber); built a live unit-economics model with sensitivity analysis.
- Recommended keeping ₹499, cutting listener minutes 80 → 60, selling counsellor sessions separately at ₹450 and dropping the AI chatbot: cost to deliver ₹761 → ₹357, +₹154 contribution per subscriber, break-even at 440 subscribers.

Tata Motors: Segmentation and Growth Strategy — *Coursework, Semester 7 (2025), team of 6; owned the Tata workstream*

- Analysed Tata's passenger-vehicle share rise from ~5% to ~14% (FY20–FY23) and its 9,220-unit gap to Hyundai in H1 FY23; built the segmentation and targeting analysis.
- Recommended three after-sales plays (service subscription, paid over-the-air upgrades, cross-group loyalty tier), two sized at an estimated ₹70–120 Cr a year.

ESG Sentiment Classifier — *Coursework, Semester 7 (2025), group; built the SVM model*

- Built a TF-IDF + linear SVM on 910 sentences with 86.84% test accuracy, then stress-tested it: 2 of 5 real-world sentences correct and 16 test sentences also in training showed it had learned templates, not sentiment.
